

# Pebble Quick Setup Guide

Please read these instructions fully before you begin installation to ensure you have everything ready.

# Terminology:

- Wi-Fi
  - Your home internet wireless connection
- BlinkUp
  - We use this to describe the process of connecting your Pebble device to your home Wi-Fi network.
- Sharing
  - The term used to describe sharing the setup you have made to anyone else with a smartphone in your household.
- Smartphone
  - Describes either your iPhone or Android mobile phone
- Cloud
  - Describes the service used to connect between your phone and your home Wi-Fi service. This is located on the internet.

# Step 1

- Home Wi-Fi
  - Please ensure your smartphone is connected to your home Wi-Fi, and have your home Wi-Fi password handy
  - Write in the box below for reference latter

- DO NOT plug the pebble into the power yet... this is done at step 7

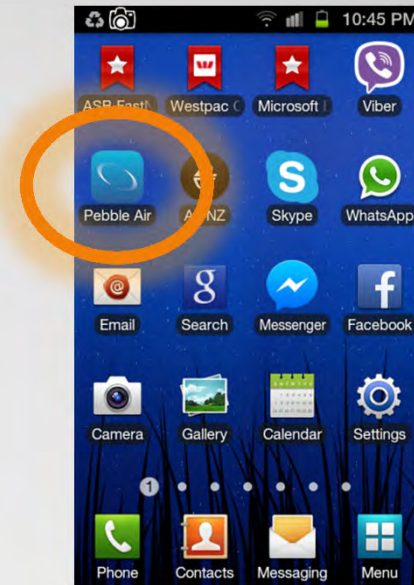

## Step 2

- Important – Ensure your phone display brightness is on high (this is required for the setup to work later)
- Download the Pebble Air Application to your smartphone

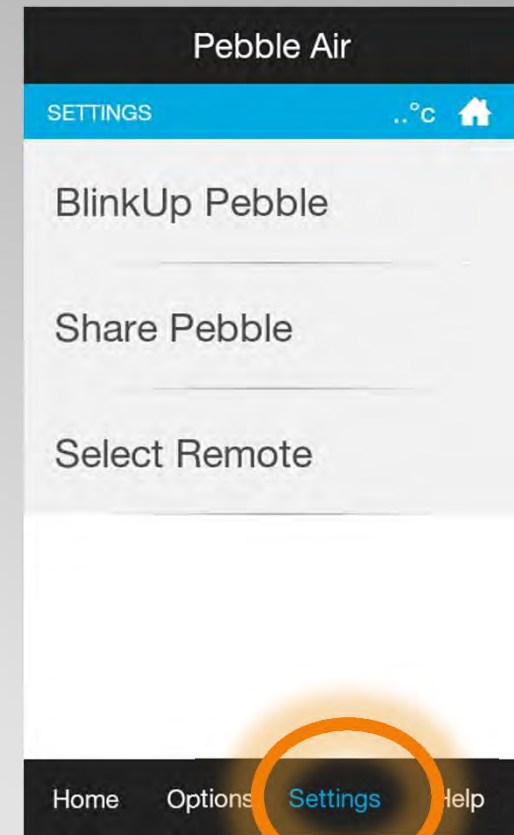

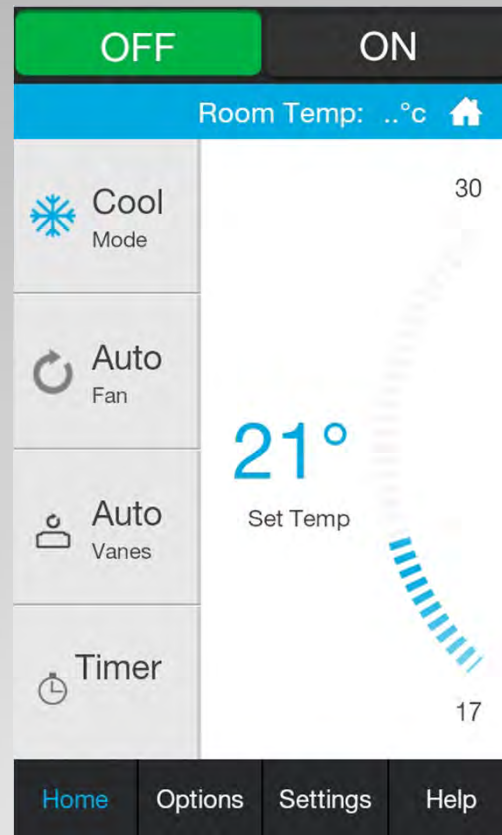

◦ Visit

- Then open the Application

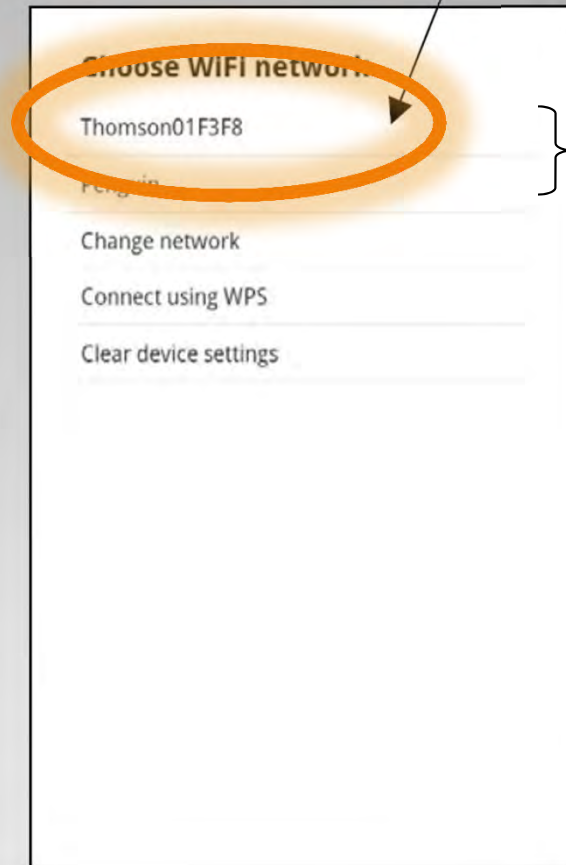

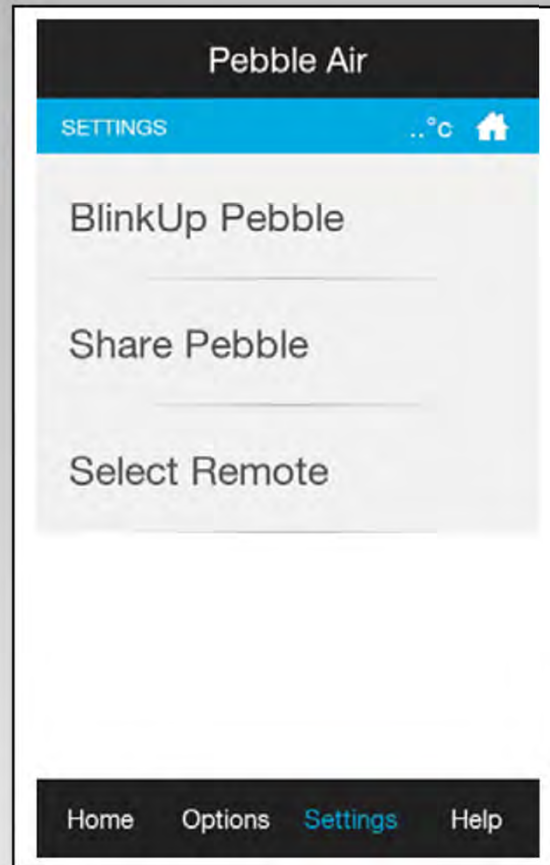

## Step 3

- Open the Pebble Air app
- Go to Settings

# Step 4

Sample only

- Select BlinkUp Pebble
- Choose your Home Wi-Fi from the list & select it

# Step 5

Use show password, this ensures the correct password is entered

Show Password

After tapping "Send BlinkUp", hold the screen close to the blinking red light on the device until the flashing ends (about 10 seconds).

Send BlinkUp

Legacy BlinkUp Mode ?

BlinkUp technology provided by Electric Imp

Sample only

- Enter your home Wi-Fi password

## Step 6

Using the supplied low voltage transformer, plug your Pebble into a local electrical socket.

(Your Pebbles LEDs will start flashing)

It is important this is not done until now as part of the setup procedure.

## Step 7

Your home WIFI should be in here

.....

Remember Password

Send BlinkUp

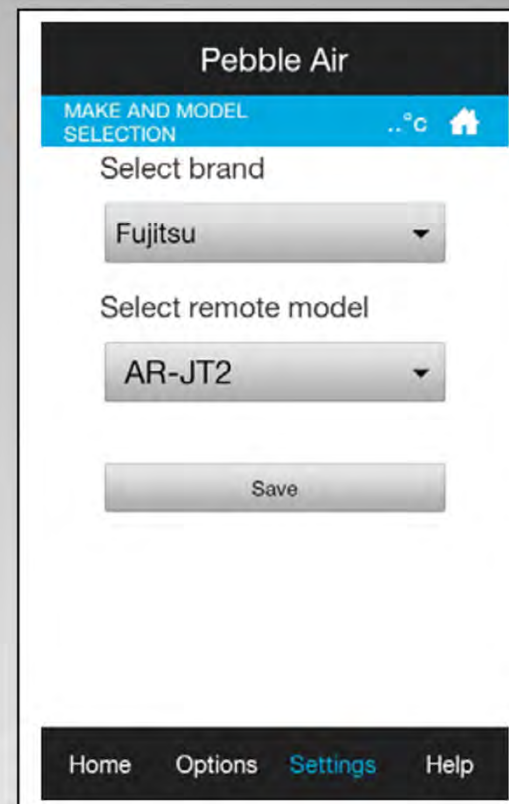

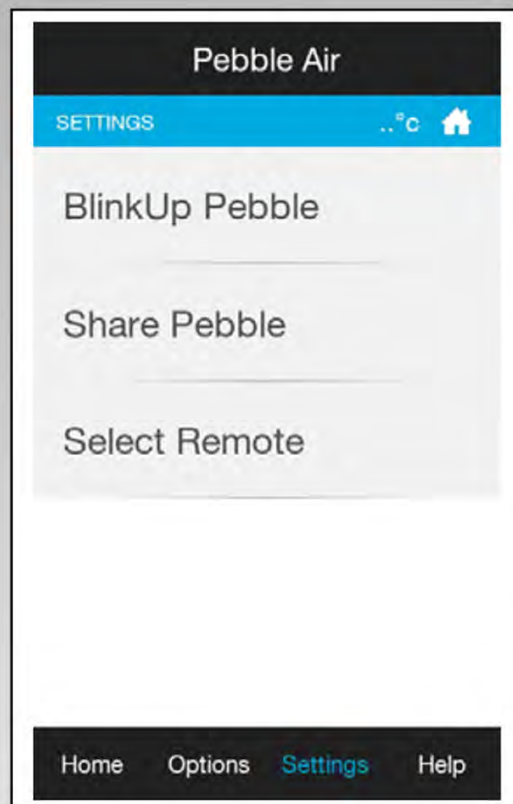

- Plug in the Pebble, press the "Send BlinkUp" button and immediately place the pebble on top of the screen of your smartphone, as shown above

## Step 8

- If setup is successful (after approx 15sec ) the GREEN LED on the Pebble will flash GREEN once then RED/Orange a few times and then GREEN again for approximately one minute. Now remove the Pebble from your smartphone and go to step 9
- If the LED flashes ORANGE or RED or does not light up again then the process has failed and it will need to be repeated. Re-do from STEP 7 Ensuring you un-plug the Pebble and wait approx. 30 seconds before plugging back in again.
- Other flashing codes are shown in the complete manual provided with the Pebble.

## Step 9

- Press Select Remote
- Choose the Brand of your Air Conditioner / Heat Pump
- Choose the Remote Control Model Number for your selected air-con/heat-pump brand (which will be found on your remote control)
- Press the Save button

# Quick Set-Up Complete

Congratulations set up complete.

Push the “home” button to start using your Pebble Air app.  
For other features like “Sharing the App” please refer to the full manual available from [www.pebbleair.com/downloads](http://www.pebbleair.com/downloads)

You must position your Pebble carefully in a considered location. It is vital that the Pebble can see the front of the air-con/heat-pump(where the infra-red receiver is) as infra-red signals cannot see around corners or go through walls.

Do not place the Pebble on or above any appliance that generates heat.
